SUMMARY

Ansh Jain is an enthusiastic engineering student with a strong foundation in programming and software development. Proficient in Java, Python, C, and JavaScript, along with web technologies like HTML, CSS, React, Next.js, Node.js, and MongoDB. Skilled in problem-solving, team collaboration, and designing, with experience in version control (Git, GitHub) and deployment tools (Netlify, Vercel, Render). Passionate about building innovative projects and open to internships.

TECHNICAL SKILLS

• Programming Languages

- Java
- CPP
- JavaScript

• Frameworks & Libraries

- HTML, CSS
- ReactJS, NextJS, NodeJS
- Bootstrap, Tailwind CSS

• Version Control

- Git
- GitHub

• Other Tools

- Postman
- Netlify
- Render
- Vercel

COURSE WORK SUBJECTS

- Operating System
- Computer Networks
- Object Oriented Programming
- Data Structure and Algorithm
- System Design
- Database Management System

ACHIEVEMENTS

- Participated in Smart India Hackathon 2023 and various other hackathons.

- Solved 250+ DSA problems on Leetcode, consistently improving problem-solving skills and algorithmic thinking.

- Completed MERN Stack course by Aryan Singh, gaining expertise in building full-stack web applications.

- Developed multiple full-stack projects, including an NFT marketplace, YouTube Clone, and a MERN-based to-do app.

- Selected for the DSA 1.0 Cohort by CODEIT, enhancing algorithmic problem-solving skills through structured learning.

EDUCATION

B.Tech. CSE- 7.78 CGPA

ABES Institute of Technology

📅 2022 - 2026 📍 Ghaziabad, UP

Intermediate - 83%

Geeta Bal Bharti Sr. Sec. School

📅 2022 📍 Rajgarh Colony, Delhi

High School - 79.2%

Geeta Bal Bharti Sr. Sec. School

📅 2020 📍 Rajgarh colony, Delhi

PROJECTS

Job Tracking App

- Tech Used: MERN Stack (MongoDB, Express.js, React, Node.js), Tailwind CSS
- A full-stack application that allows users to track their job applications by adding, editing, and managing job details and statuses.
- Features include user authentication, search and filter functionality, and a responsive dashboard for visualizing job progress.

YouTube Clone (YouTube 2.0)

- Tech Used: React, Redux, Firebase, YouTube API, Tailwind CSS
- A feature-rich video streaming platform inspired by YouTube.
- Includes functionalities like video upload, search, recommendations, and user authentication.
- Responsive and optimized UI for a seamless video-watching experience.

Invoice Generator

- A web app to create, customize, and download professional invoices with client and billing details.
- Supports real-time calculations and PDF export for easy sharing.
